A simple connection enables you to start purchasing from DM quickly, serving as a long-term solution or a bridge while you work on a more sophisticated integration.

Want to add some automation to the process? Schedule daily delivery of your order spreadsheet (.csv or .xml file) via an sFTP site and our system will pick up the orders and process them automatically. You can choose to use DM's sFTP site or provide your own.

DM DISTRIBUTION[®]
MANAGEMENT

DM Application Programming Interface (API)

With a little programming, an API call to our end points can be established for full connectivity to all the features we offer. Our API calls include:

- PO Placement including options for identifying shipping methods, shipping windows, fill/kill options and more
- PO Acknowledgement for order status and other settings
- Ship Notices for tracking information and contents of each box/pallet
- Cancel Order options letting you programmatically cancel orders
- Invoicing Pulls for your orders
- Catalog Requests to pull product availability and pricing

For full specifications, [CLICK HERE](#).

Electronic Data Interchange

DM has extensive expertise in EDI and can efficiently receive and process orders via EDI documents.

- 850 – PO Placement
- 855 – PO Acknowledgement
- 856 – Shipment Notice
- 997 – Delivery Confirmation
- 810 – Invoicing
- 846 – Inventory Sync
- 832 – Catalog Items

Full specifications for our documents are available upon request.

For more information or to speak with one of our integration experts, please contact us at integrations@distributionmgmt.com.
